Profile

Hi, I'm Scott. I'm a web designer currently living in Salt Lake City. I've been working the web professionally for over 10 years, and pride myself on attention to detail. Pixel-perfect isn't just a lofty goal, it's my mantra. Design is not just an interest, or a job, but an obsession. It's impossible for me to read a book or magazine without studying its typography and layout. Truly a gift and a curse; Comic Sans makes me physically ill... I've been into computers for as long as I can remember. Since my childhood, when I taught myself BASIC on the Commodore 64, technology has been my passion.

Experience

WEB DEVELOPER • SIMLER, 2009—2010

Simler was a social network built to connect people with similar interests. For example, if you like soccer, you can easily find other soccer players around you, as well as anywhere on the network. At Simler, I was responsible for bridging the front-end/back-end divide. Including, but not limited to; front-end development, Python development, UX design, cross-browser compatibility testing, and design/development of the iPhone application.

HEAD HONCHO • NIFTYPIXELS.COM, 2008—PRESENT

My own little corner of the internet, where I've run my freelance business for the past couple years. A real one-man army; I'm in charge of design + development.

TECHNOLOGY DIRECTOR, PRINCIPAL • TMT ADVERTISING, 2003—2008

TMT Advertising was my first venture as an entrepreneur. Founded with Chris Maynes, the Art Director from Media League, TMT provided full-service agency support for small-to-medium sized businesses. We carved a niche for ourselves via word of mouth business, by building brands & websites for local homebuilders. In addition to day-to-day management, I was directly responsible for all things technical. From server administration to back- & front-end development, and everywhere in between.

TECHNOLOGY DIRECTOR • MEDIA LEAGUE, 2001—2003

At Media League I led a small team of developers in taking design files and seeing their execution through to a finished product. From the smallest brochure sites to full blown eCommerce and content management systems, we did it all. I built, managed, and maintained our office network as well as our co-located Linux-based server infrastructure. In addition to technical tasks, I also accompanied the creative director in all pitches and client meetings.
